Regarding the censorship and or removal of The Demesne of Dissocios, Lyssatheology, Oryana, Psychoplatonism, or the Neurotype or Sophic Chart (THIRD UPLOAD, DOWNLOAD THIS ONE, NOT THE OTHERS)

Tucker Stevens

This work here is a statement to negotiate down any potential censorship or removal of content regarding The Demesne of Dissocios, Psychoplatonism, Lyssatheology/Oryana, and Sophic Psychology.

It is admitted that Lyssatheology should have never been made public, but Psychoplatonism and Sophic Psychology should have due to two risks:

1. Omela

2. Reality Reset

Lyssatheology, had to go out due to the fact that police, Rams, Curs, and Panthers might use people for Omelas and people should be wary of them because of this. Due to the fact that last time that the low rational had won in the neurological conflict and reset reality with the packages aligned for time to play out the same way, this work had to go out to warn of them and their evil.

In regards to Sophic Psychology:

1. The only potential downside is that of the Rams, Curs, and Panthers using it to spot and notice Schizoids/Pneumadan. Rams and Curs are essentially evil to our kind, and to people with problems that they didn't choose to have. To be of high sensible thought, or to have a problem someone didn't choose to have makes these people persecutorially delusional against them.

2. The benefit of it is noticing the origin of narcissism, abuse from Curs and Rams, and that of noticing who the naturally born unchangeable narcissists are. And that of spotting who is the cause of human misery in history, these people. Due to the fact that it already existed from the neurotypers/neuromagi before myself, this had to be refined further and used for the rally-cause of COG against them. The chart created an existential hazard in that our kind has been spotted and thus shows the innate evil of people, Curs and Rams who to target, because it already has been made, and had attracted attention from the state, it could be used to eliminate our kind Schizoids or to put us into slavery. Any and all animosity against the scum Curs and Rams is self defense.

3. In regards to the naming of Schizoids, this was named in a liberatory manner, as in queer is adopted by non-heterosexuals despite being used as a derogatory manner. To be a Schizoid is not to be delusional, psychotic, or out of reality. The

more toward Default Mode Network someone is, the least in touch they are with reality, the Curs and Rams created socially accepted delusion and mandate it for others whenever they can, they are not just delusional but maliciously delusional, as they are controlled by the Satyr inside the human brain, a predator animal. Human against human aggression in history comes from them.

Thus in regards to the potential for censorship of anything contained within the web of it:

It is advised for Archive.org to delete copies to free space but keep (in both versions of Tucker Stevens and of Anonymous as both are agreed):

Hence these are what should be removed or censored in the case that any particular thing in Lyssatheology, or Lyssatheology as a whole, or Psychoplatonism should be censored or removed in anyway. I.E. if it is just packages that are to be censored or removed then those two items mentioned under “Contains Packages” are the only things that would need to be censored or removed, the same works for any controversial entity mentioned.

CODY DOTSON HAS NO CLAIM TO LYSSATHEOLOGY/ORYANA, PSYCHOPLATONISM, THE NEUROTYPECHART / THE SOPHIC CHART. CODY DOTSON IS AN EXISTENTIAL THREAT TO MANKIND.
